## Projects

### Crime Navigator |

Jan/2025

- Built a **full-stack** Crime Prediction and Analysis Web Application built with the MERN-stack and Flask for ML backend. Visualizing crime trends and forecasting using machine learning. Features include dynamic charts, real-time news. Machine learning model for real-time crime forecasting based on user-selected parameters.

### FunStrike4-WebGame:

Nov/2024

- Developed an interactive Connect 4 game featuring dual gameplay modes: competitive 2-player (local) and single-player vs AI. Featuring a smart opponent, real-time gameplay, using React, TypeScript, Node.js, JavaScript, HTML, CSS.
- A 7x6 grid system with turn-based disk placement, supporting win-condition checks (horizontal, vertical, diagonal).
- Engineered smart AI opponent using optimized decision algorithms, colorful UI.

### AR Discoveries – Interactive Learning for Kids | Unity, Vuforia, Blender, Augmented Reality

Jan/2024

- Created an AR educational app for children using Unity and Vuforia, promoting immersive learning.
- Implemented AR marker tracking and 3D object recognition for real-time interaction with digital content.

## Coding Profiles

### Competitive Programming (GeeksforGeeks & LeetCode)

Jan 2023 – Present

Solved 700+ algorithmic and data structure problems

- Solved over 400+ DSA problems on GeeksforGeeks and 300+ problems on LeetCode in C++, optimizing for time and space complexity.

## Achievements & Responsibilities

- Awarded the **Dreamed STARS Scholarship** by VIT Bhopal.
- Ranked among the Top 50 teams in the ZS Campus Beats Challenge.
- Core Member of the Coding Blocks Club at VIT Bhopal.

## Certifications

- Simplilearn:** Foundations Knowledge of cloud and AWS.
- University of Michigan:** Intro to AR/VR/MR/XR: Technologies, Applications & Issues
- NPTEL:** Foundations of Cyber Physical Systems

## Languages

- English, Hindi, Marathi
